

SAFETY DATA SHEETS REQUIREMENTS

OSHA's modified Hazard Communication Standard adopting the Globally Harmonized System of Classification and Labeling of Chemicals requires Safety Data Sheets (SDS) be readily available for any hazardous chemical. The SDS is a detailed information bulletin prepared by the manufacture or importer of a chemical that describes the physical and chemical properties, physical and health hazards, routes of exposure, precautions for safe handling and use, emergency and first aid procedures, and control measures. General health hazards information and precautions for safe handling and use should be the focus of concern.

An SDS shall include the information specified under the section number and heading indicated for sections 1–11 and 16 below. If no relevant information is found for any given subheading within a section, the SDS shall clearly indicate that no applicable information is available. Sections 12–15 may be included in the SDS, but are not mandatory.

Section 1, Identification includes product identifier used on the label; other means of identification; manufacturer or distributor name, address, phone number; emergency phone number; recommended use; restrictions on use.

Section 2, Hazard(s) identification includes classification of the chemical, signal word, hazard statement(s), symbol(s) and precautionary statement(s), and any hazards not otherwise classified that have been identified during the classification process.

Section 3, Composition/information on ingredients includes information on chemical ingredients; trade secret claims.

Section 4, First-aid measures includes description of necessary measures, subdivided according to the different routes of exposure, i.e., inhalation, skin and eye contact and ingestion; most important symptoms/effects, acute, delayed; required treatment.

Section 5, Fire-fighting measures lists suitable (and unsuitable) extinguishing techniques, equipment; specific chemical hazards from fire; special protective equipment and precautions for fire-fighters.

Section 6, Accidental release measures lists emergency procedures; protective equipment; proper methods of containment and cleanup.

Section 7, Handling and storage lists precautions for safe handling and conditions for safe storage, including any incompatibilities.

Section 8, Exposure controls/personal protection lists OSHA's Permissible Exposure Limits (PELs); Threshold Limit Values (TLVs), and any other exposure limit used or recommended by the chemical manufacturer, importer or employers preparing the SDS, where available; appropriate engineering controls; personal protective equipment (PPE).

Section 9, Physical and chemical properties lists the chemical's characteristics.

Section 10, Stability and reactivity lists chemical reactivity and stability, possibility of hazardous reactions, conditions to avoid and incompatible materials.

Section 11, Toxicological information includes description of various toxicological (health) effects and the available data used to identify those effects, including routes of exposure; related symptoms, acute and chronic effects; numerical measures of toxicity, whether the hazardous chemical is listed in the NTP Report on Carcinogens or has been found to be a potential carcinogen by IARC or by OSHA.

Section 12, Ecological information (Non-mandatory) includes ecotoxicity, persistence and biodegradability, bioaccumulative potential, mobility in soil and other adverse effects.

Section 13, Disposal considerations (Non-mandatory) includes description of waste residues and information on their safe handling and methods of disposal, including the disposal of any contaminated packaging.

Section 14, Transport information (Non-mandatory) includes UN number, UN proper shipping name, transport hazard class(es), packing group, environmental hazards, transport in bulk, special precautions.

Section 15, Regulatory information (Non-mandatory) includes safety, health and environmental regulations specific for the product in question.

Section 16, Other information includes the date of preparation of the SDS or the last change to it.

Agreement: I have read the SDS guidelines above and on behalf of my company state that:

(Check appropriate item)

_____ We currently **DO NOT** sell product to Tuesday Morning requiring SDS.

_____ We **DO** sell product to Tuesday Morning requiring SDS and will be faxing or mailing the appropriate data sheets along with this signed document.

(Company name) (Signature) (Date)

Return to:
Tuesday Morning
